Synchronicity, the Law of Attraction, premonition, intuition -is it my imagination or what?

I find I read a book - eg - I read the book recently about Ian Curtis - the deceased lead singer of Joy Division. He had epilepsy, I started to feel sad, etc - then I discover an old friend (whom I suddenly had the overwhelming urge to telephone), has been diagnosed with epilepsy. This sort of thing happens to me ALL the time, I read a book, sometimes fiction, sometimes non-fiction and then -- I meet someone who has a very similar predicament. Can anyone explain?
